Arbeitspensum
Vollzeit

Arbeitsort
Max-Planck-Straße 25, 61381, Friedrichsdorf, Hesse, Germany

Beschreibung

To strengthen our team, we are currently looking for several **injection molding machine setters** (m/f/d).

Zuständigkeiten / Hauptaufgaben

- Operating injection molding machines and troubleshooting minor malfunctions
- Removing parts, labeling the removed parts according to specifications, and recording production data according to specifications
- Setting up and assembling all accessories according to specifications
- Starting up the tools, evaluating the produced parts for production release
- Optimizing production processes and machine configuration
- Inspecting and validating new tools, including documentation
- Transferring new and optimized tools to production
- Coordinating the necessary tool measures in conjunction with the new construction or service management in toolmaking
- Assembling and disassembling tools, setting up the machines, including entering production data

Qualifikationen / Anforderungen

- Successfully completed vocational training as a process mechanic (m/f/d) or several years of professional experience as a setter (m/f/d) in plastics manufacturing
- Good PC skills and confident use of MS Office
- Structured and independent way of working
- Ability to work in a team, initiative, and high level of motivation
- Willingness to work shifts
